

BARNABAS MIKEL

Frontend-Focused Full-Stack Engineer

mrbarxn@gmail.com | github.com/Mrbarxn | barnx-portfolio-v2.vercel.app | linkedin.com/in/mrbarns | Nigeria / Remote

PROFESSIONAL SUMMARY

Frontend-focused full-stack engineer with 3+ years of experience building responsive web applications with React, Vue, Next.js and Node.js. Strongest in frontend architecture, design systems and polished product interfaces, with growing hands-on work in backend engineering, AI integrations, workflow automation and cloud deployment.

PROFESSIONAL EXPERIENCE

Frontend Engineer | Imisi Health | Apr 2026 - Present

- Build and maintain accessible, responsive product interfaces for digital healthcare workflows.
- Develop reusable frontend components and contribute to consistent application patterns.
- Collaborate with backend engineers and product stakeholders to integrate APIs and deliver features.
- Participate in code reviews, debugging and quality improvements across the frontend codebase.

Lead Frontend Developer & UI/UX Designer | Synlo, Nigeria | Nov 2025 - Present

- Lead frontend implementation and interface design for a SocialFi product combining event discovery, matchmaking and AI-assisted interactions.
- Translate product concepts into responsive user flows, reusable components and interaction patterns.

Full-Stack Developer | VIN Startup Project, Kenya | Nov 2024 - 2025

- Built a multimodal AI chat interface supporting text, image and file inputs.
- Developed Node.js and Express REST APIs and deployed serverless workflows on Vercel.

Backend Developer | SIMM, France | Mar 2024 - Jun 2025

- Designed APIs for AI-powered applications with authentication, rate limiting and data validation.
- Kept server logic lightweight and maintainable to support responsive intelligent frontends.

Frontend Developer | Learni | May 2023 - 2025

- Contributed frontend development to a decentralized Web3 learning platform.
- Built responsive views and supported product iteration across core learning experiences.

Freelance UI/UX Designer | Zogo, Nigeria | Jun 2024 - Aug 2024

- Delivered interface design work for a time-bound freelance engagement.
- Converted product requirements into clear, usable screen flows and visual specifications.

SELECTED PROJECTS

Subly | React 19, Vite, Tailwind CSS, Supabase, Cloudflare Turnstile

Premium digital access marketplace with responsive commerce, dashboard and lead-capture experiences. Business value: Creates a polished storefront and conversion flow for digital products while laying the foundation for secure fulfillment and account workflows.

BANX | Next.js 16, TypeScript, Tailwind CSS, Three.js

Modern automation studio website with interactive 3D visuals, service packaging and conversion-focused sections. Business value: Positions AI automation services clearly and turns attention into qualified sales conversations.

Omni-Channel AI Chatbot | Node.js, Express, Prisma, PostgreSQL, WhatsApp Cloud API

Shared AI conversation backend for website and WhatsApp with lead capture, qualification and handoff flows. Business value: Gives businesses one conversation layer for instant replies, lead qualification and booking or payment handoffs.

TECHNICAL SKILLS

Frontend: React, Vue 3, Next.js, TypeScript, JavaScript, Vite, Tailwind CSS, responsive UI, component architecture

Backend: Node.js, Express, REST APIs, serverless functions, Prisma, PostgreSQL, Supabase

AI: AI API integration, OpenRouter, Qwen, multimodal inputs, prompt engineering, client-side orchestration

Automation: Workflow design, conversational automation, WhatsApp integrations, lead qualification flows

Tools: Git, GitHub, Vercel, npm, Figma, Cloudflare Turnstile
